DESIGN

## UI – User Interface

User interface (UI) design is the process designers use to build interfaces in software or computerized devices, focusing on looks or style.

Designers aim to create interfaces which users find easy to use and pleasurable.

**UI / UX**

## UX – User Experience

User experience (UX) design is the process design teams use to create products that provide meaningful and relevant experiences to users. This involves the design of the entire process of acquiring and integrating the product, including aspects of branding, design, usability and function.
